

Licence to use the demo version of

# POLPRED

POLPRED for Windows is available for demonstration and evaluation purposes. Before you can use the software, you need to obtain a configuration file and a licence file which when copied into the installation directory, will unlock the program for the demonstration period and area. To obtain these files, print out this document, sign it to state you agree with the terms and conditions of use and fax (0151 795 4905) or e-mail it back to NOC (email: [dataproduts@noc.ac.uk](mailto:dataproduts@noc.ac.uk)).

Please read the following notes about the demo version of POLPRED for Windows:

- **The program will not work** until you have signed this licence and received the configuration file and licence file to 'unlock' the software. These files can be sent to you either by e-mail or by post on floppy disk.
- The demo licence will permit the software to make computations for the month of September 2000 and for the area shown right. This should be sufficient for evaluation of the software.
- It uses data that has since been superseded by a much more accurate data set used in the full version of the program.
- The program and any output from the program must not be used for any commercial or research purpose. Contact the National Oceanography Centre ([dataproduts@noc.ac.uk](mailto:dataproduts@noc.ac.uk)) for details on purchasing the software.
- Technical support for the demo version of POLPRED is limited to problems encountered during installation only.

## Demo Version of POLPRED for Windows - Terms and Conditions of Use

By signing this agreement and returning it to NOC (by fax or e-mail), I understand:

- that I must only use the software for demo and evaluation purposes. Any results obtained from the program will not be used for any commercial or non-commercial activity. If I require a licence for either commercial or academic use, I will contact the National Oceanography Centre.
- that NOC does not guarantee that the functions contained in the program will meet your requirements, or that the operation of the program will be either error free or appear precisely as described in any documentation.
- that NOC reserves the right to make improvements, substitutions, modifications or enhancements to the software.
- that no responsibility can be accepted by the Natural Environment Research Council for any consequential loss or damage arising from any use that is made of the software, and output from the software, howsoever caused.

Only sign this if you agree to the terms and conditions set out above:
